### **Abstract**

This aim of this study is to obtain the expectations of private sectors from students which are graduated from textile and clothing production technology programme. In this scope, expectations are obtained by the way of meeting and making a survey with the taskmasters.

This survey which was consisted of twenty questions and five likert scale, based on statistical analysis. Twenty sector representer was attended to survey. In the scope of the survey, a lot of İnformation was given about textile and clothing production technology education. Finally goals are reached by the way of presenting survey, methods and hypothesis.

After the survey, private sector expectations which are reletad with graduated student from textile and clothing production technology was obtained. Result of the survey showed that classes which are taken at university practically and theoretically does not meet requirements of the sector. According to the findings, results were disputed and advices were given.

**Keywords:** Textile program, vocational high school, survey.
