### Abstract

In this study, 5082 employee's educational status in the various companies located in Manisa Organized Industrial Zone was evaluated and the effectiveness of the branch of vocational schools was investigated. For this purpose, a survey was organized. Analysis of obtained results was made using SPSS program. The number of engineers, technicians and unskilled labor was also determined regarding their professions and/or branches and results were also shown in the graphics. Based on the results, the needed labor of Manisa Organized Industrial Zone was determined and it's believed that this study would be useful when deciding the quota of the current programs and for deciding on new educational programs in Celal Bayar University according to industrial demands.

**Key Words:** Vocational and Technical Education, Employment, Organized Industrial Zone.
