Abstract

In recent years, it is observed that the number of students graduated from vocational colleges in Accounting and Tax Applications program is increasing. Despite this, it is also seen that in the business world there is a need for qualified professional staff in this sector. Personal career planning of a qualified staff begins with years of training.

In this study, expectations and career plans of the students who are in the program of Accounting and Tax Applications were searched. A questionnaire study on the level of consciousness about career planning after graduation has been done to the students who are in İnönü University Malatya Vocational School Accounting and Tax Applications program selected in the study. 160 students have participated in questionnaire. The purpose, methodology and hypothesis of the research carried out have been revealed and the result has been achieved.

Keywords: Vocational school, student, career.
