### Abstract

In this study; it is investigated what general type of personality traits and attitudes of teachers who had positive lasting impression in personal thought of adults, deeply affected students and in what direction teachers must develop their personality traits and attitudes to touch students' lives. In the conduct of research "general screening model" is used. "Survey of Common Personality Traits and Behavior of Teachers Who Have Positive Long Lasting Impression in Adults' Thinking Life" has been configured by researchers in order to determine the opinions. 100 people groups, who have graduated from at least primary school and older than 18 years old, have been identified for the survey. The questionnaire was administered to the required sample. The data were interpreted with the aid of simple tables of statistical process and frequency agglomerations, arithmetic mean and percentage. According to survey results; the most emphasised personality characteristics of teachers in Turkey are; being communicative, lovely, friendly, attitudes about their profession; loving his/her profession, enlightening, guiding, general characteristics of a teacher; being mature, self-confident and sensible. Based on the results, some suggestions are proposed to teachers, practitioners and researchers in the name of accessing to personal maturity and develop positive attitudes.

**Key Words:** Personality of Teachers, Attitude, Thoughts of Students, Education of Teacher.
