Abstract

In this work, it is aimed that the effects of surrealism on creativity of students in education of fashion design. In this research, experimental design model was used with pretest and posttest control groups. The population of the study was consist of the students where they are in Gazi University Faculty of Vocational Education in Ankara. Also, the sample of the study is made the course of "Collection Preparing" in the 2012-2011 semester 4th year students in department of fashion designer teacher students who randomly selected experiment and control group.

At the end of the research, we achieve the success in the knowledge levels, attitudes and and their creativity successfully increase on the group. For that purpose, education of the art movements is crucial for development of creativity on students, because this directly affects the using new colors and forms that transfer to the fashion design course.

Key Words: Surrealism, creativity, fashion, design, education.
