Abstract

Existentialism is regarded as a philosophy questioning the place of human being in the universe, the qualities of existence, the effect and reaction of existing. It claims that human beings have been thrown into universe without their will and consciousness. It compares existence and matter and claims that existence comes before essence and or so called matter. The reflection of this philosophical movement to education is individualism that says individuals should be at the center of education and everything in the educational systems should be regulated according to the individuals. Individual is to realize himself or herself and this requires freedom. This qualitative study aims to present the ideas of businessperson, who works in a capitalist economic system and who completed all stages of education. Thus, the views and evaluations of such a businessman are important. Face-to-face interview was used in order to collect data in this research. The findings were analyzed with content analysis method and findings are given in subtitles.

Keywords: Individualism, Philosophy of education, business World, Liberty, Existentialism.
