### Abstract

The aim of this study is to review of "Harmony", the book which has been compiled by Nurhan Cangal and to assess the dimensions of scientific content, educational and morphological layouts of the relevant book. The data has been obtained by literature survey and document analysis. With respect to the research findings it has been inferred that the scientific content of the book "Harmony" which has been compiled by Nurhan Cangal is qualified, its educational layout has been presented in a systematic integrity, its morphological lay out is qualitative. As per research findings, it is recommended that this book be taught as harmony education textbook in the Professional Music Institutions, besides that its enrichment with a CD attachment of the samples of audio recordings which are in the book and attachment of an answer key corresponds to the sample questions in the relevant part of the book.
