Abstract

Blogs are one of the online interaction and sharing tools. These are internet media that can be produced with basic internet information, can be archived, interpreted and shared with text, video, photographs and graphics. Blogs categorized by technical specifications, content specifications, or purpose of use; Institutions and individuals.

In this study; Approaches to the concept of "distance learning" will be determined and examined in Turkish personal blogs, which are found by searching in different contexts in commonly used search engines.

Keywords: Distance education, weblogs, blogs.
