### Abstract

The purpose of this studying is to determine the expectations of traditional handicrafts students which study at Arapgir Vocational High School. In this scope, some meetings are held with the forty five students which study at the traditional handicraft programme. Also, by doing some statistical analysis career expectations of students are obtained. A pool which consists of twenty question is took and some statictical analysis are done. In the studies, the researches made out by showing the aims, methods and hypothesizes. After the studying, some meetings are held with the freshman year students and the 2<sup>nd</sup> year students to obtain the differences about career expectation. According to studies, some differences are obtained about the career expectations of students in the term of education. In line with these, results are discussed and some advices are given.

**Keywords:** Traditional handicrafts, student, survey.
