### Abstract

This study was carried out in order to determine the time management skills of the technical programs of Inonu University Arapgir Vocational School. The universe of the research consists of 120 students studying in the Automotive Technology, Electricity, Mechatronics, Natural Gas and Installations Technology programs of İnönü University Arapgir Vocational School in the academic year of 2016-2017. A 15-question survey was applied to the collection of data. Students were administered a 3-Likert-scale questionnaire and the reliability of the statistical analyses was performed according to the repeat test repeat method.

In the study, it was observed that students often did not do their time well. In the conclusion part, what needs to be done in order to make time etude better was examined.
