Abstract

In Turkey, many innovations have occurred in the field of music as in all areas with the proclamation of the republic. Some of them, sending abroad talented Turkish children for education under the leadership of Atatürk, more importance be given to music education in the institutions is even bringing educators from abroad to do so and asked to compose works of Turkish composers using western characteristics of the music. Some of talented Turkish young people sent or gone with their own facilities became educators and continued to compose after returning to Turkey, a portion of them moved abroad and they represent Turkey in different countries successfully. The subject of this research is Turkish female flutists that representing Turkey abroad. The research consists two well-known Turkish women flutists whose talents were discovered at an early age, educated abroad and continue their lives and careers abroad as educators and soloists. This is a descriptive study and conducted through literature. Data for research has gained by a semi-structured oral interview form. Data obtained was analyzed with content analysis. The conclusions and recommendations reached by the findings.

Keywords: Music, flute, turkish female flutists.
