Abstract

This research aims to reveal the causes of stress in pre-service music teachers,' by utilizing their opinions. The study in which music teacher candidates investigated the sources of stress they had during their undergraduate studies was designed by qualitative research method. The study group of the research is composed of ten students who are studying in the last class in the Music Education Department of Balıkesir University Necatibey Education Faculty Fine Arts Education Department. In the study, a semi-structured interview form was used as a data collection tool. Opinions about the sources of stress of musical teacher candidates are grouped into various themes by evaluating them in three basic categories. Later, we will try to develop suggestions that can guide based on the results of the research.

Keywords: Music education, pre-service music teachers, stres sources.
