Abstract

The most important problems encountered in the courses which are given by distance education methods are the lack of communication among the students and instructors. Nowadays, live courses are performed to eliminating interaction problems with web based seminar (WEBINAR) applications. In the Kocaeli University, a part of university elective courses are taught with distance education method as web based. In this study, the experience of live class application that performed is presented to improve interaction between instructors and students in electronic elective courses (EEC).

Keywords: Distance Learning, Live Class, WEBINAR, EEC.
